Special Hazards Arising from the Sul Hazardous Combustion Products:	bstance or Mixture Formation of toxic gases is possible during heating or fire.		
Fire / Explosion Hazards:	Fine particles (such as dust and mists) may fuel fires/explosions.		
Advice for Fire-Fighters During all fire fighting activities, v	wear appropriate protective equipment, including self-contained breathing apparatus.		
6.	ACCIDENTAL RELEASE MEASURES		
Personal Precautions, Protective Equ Personnel involved in clean-up s	uipment and Emergency Procedures hould wear appropriate personal protective equipment (see Section 8). Minimize exposure.		
Environmental Precautions Place waste in an appropriately I	abeled, sealed container for disposal. Care should be taken to avoid environmental release.		
Methods and Material for Containme Measures for Cleaning / Collecting:	nt and Cleaning Up Contain the source of the spill if it is safe to do so. Wipe up with a damp cloth and place in container for disposal. Clean contaminated surface thoroughly.		
Additional Consideration for Large Spills:	Non-essential personnel should be evacuated from affected area. Report emergency situations immediately. Clean up operations should only be undertaken by trained personnel.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

The purpose of the Occupational Exposure Band (OEB) classification system is to separate substances into different Hazard categories when the available data are sufficient to do so, but inadequate to establish an Occupational Exposure Limit (OEL). The OEB given is based upon an analysis of all currently available data; as such, this value may be subject to revision when new information becomes available.

Polymyxin B Zoetis OEB	OEB 2 - Sensitizer (control exposure to the range of 100ug/m ³ to < 1000ug/m ³ , provide additional precautions to protect from skin contact)
Exposure Controls	
Engineering Controls:	Engineering controls should be used as the primary means to control exposures. Keep airborne contamination levels below the exposure limits listed above in this section. General room ventilation is adequate unless the process generates dust, mist or fumes.
Personal Protective	Refer to applicable national standards and regulations in the selection and use of personal
Equipment:	protective equipment (PPE).
Hands:	Wear impervious gloves if skin contact is possible.
Eyes:	Safety glasses or goggles
Skin:	Use protective clothing (uniforms, lab coats, disposable coveralls, etc.) in both production and laboratory areas.
Respiratory protection:	If airborne exposures are within or exceed the Occupational Exposure Band (OEB) range, wear an appropriate respirator with a protection factor sufficient to control exposures to the bottom of the OEB range.
