†Based on digestion testing conducted at the Purina PetCare Technology Centers

<sup>1</sup> Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require 15% to 25% more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.

<sup>2</sup> Kilocalories of metabolizable energy (ME)

<sup>3</sup> This daily amount should be divided into several small meals throughout the day.

<sup>4</sup> For each additional 10 lbs of body weight, feed an additional 114 kilocalories.
